

Newsletter 18 December 2024

New notification system i 2025 - "ENLIsag"

As mentioned in previous newsletters, ENLI will introduce a new case management system, including a new notification system for affiliated companies in 2025.

We are ahead of schedule and have completed the testing phase. We have already included around 30 pharmaceutical companies in the new notification system.

All affiliated companies that have not already switched to ENLIsag will receive an email during week 3 with information about log in etc. in order to switch to ENLIsag. In January, access to ENLIsag will take place via the link that you receive in the above-mentioned email. As of February 1, 2025, log in etc. will take place from ENLI's website - just as it does today - and thus the "old" notification site will be closed at the end of January 2025.

New features for pharmaceutical companies include the possibility of having one or more administrators in the company who can see all colleagues' notifications of activities to ENLI, so that the company can get a complete overview. New users in the company, or consultants working for the company, can register as a user in the system and request an association with the company. The user will only be able to report activities for the company once the user creation has been approved by an administrator in the company.

All users created in the current system will be transferred to the new ENLIsag system as users. If there is only one user associated with the company, they will automatically be assigned an "administrator" role. If there are several users in the company, ENLI's secretariat have contacted the company for selection of administrators.

In ENLIsag, it will be possible to create drafts so that you can start a review and come back to it later if you need more information. In addition, it will be possible to specify currency when reviewing catering, as well as upload larger files and multiple file formats.

ENLI will publish user guides during the transition to ENLIsag, and the secretariat is ready with help and guidance by phone and email.

Both the new system and user guides will be available in Danish and English versions.

Information about donations and collaborations with patient organizations

ENLI has sent out forms for affiliated companies to complete regarding reporting of donations and collaborations with patient associations.

The reporting to ENLI must be made no later than January 23, 2025. In the first quarter of 2025, ENLI will publish the reports in complete forms on

www.enli.dk.

If the pharmaceutical company has not made donations or collaborated with patient organizations, this must also be reported to ENLI.

Merry Christmas and Happy New Year

ENLI is open for telephone calls and emails up to and including December 20, 2024. ENLI is closed for inquiries from December 21, 2024 up to and including January 5, 2025.

ENLI will answer phones and emails again from January 6, 2025.

For consultations over Christmas, it is possible to extend the consultation deadline to ENLI if this is needed due to the holidays. The secretariat can be contacted by phone or email before December 20, 2024, if there is a need for an extension of the consultation deadline.

For a large number of requests for pre-approval, there may be a need to postpone the case processing deadline, cf. Section 6, paragraph 5, in fine, according to which ENLI may in special cases extend the case processing deadline beyond the 10 working days, for example in connection with summer and Christmas holidays.
